## **CLAIMS 1-27 ARE PRESENTED FOR EXAMINATION**

### **DETAILED ACTION**

#### ***OBJECTIONS TO THE SPECIFICATION***

Applicant's specification is objected to since it lacks a Brief Description of the Figures and the required title for Summary of Invention. Correction is required.

### **DETAILED ACTION**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-27 are rejected under the judicially created doctrine of double patenting over claim 1-2 of U. S. Patent No. 6,331,514 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: the claims are drawn to a method of preparing a disinfecting solution which claims the use of calcium as the metal and various salts thereof.. It would be obvious to use applicants' claimed preparation as set forth in

Art Unit: 1617

applicant's claims since at page 6 of the specification applicant sets forth the requirement for metal, including calcium, and the patent recites the use metal at column 4 lines 23-67. This obvious type double Patenting rejection is deemed proper since the claims in the application would be generic to those of the patent..

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

None of the claims are allowed.
